Konfiguration bei Kolja

```
sudo apt-get update
sudo apt-get install x11-xserver-utils
```

```
xrandr -d :0 --output HDMI-1 --off
```

```
xrandr -d :0 --output HDMI-1 --auto
```

```
xrandr -d :0 --output HDMI-2 --auto --rotate left
```

iobroker Javascripts zur Displaysteuerung über SSH

Display aus

```
var SSH = require('simple-ssh');
var ssh = new SSH({
    host: '192.168.xx.xx',
    user: 'user',
    pass: 'password'
});

ssh.exec('xrandr -d :0 --output HDMI-2 --off').start();
```

Display an + 90° Drehung nach links

```
var SSH = require('simple-ssh');
var ssh = new SSH({
    host: '192.168.xx.xx',
    user: 'user',
    pass: 'password'
});

ssh.exec('xrandr -d :0 --output HDMI-2 --auto --rotate left').start();
```
